

# Group 11

## **Team Members**

|               |        |
|---------------|--------|
| Ankit Kumar   | 160120 |
| Sahil Dhull   | 160607 |
| Shubham Singh | 160674 |

## **Project Details**

|                         |   |        |
|-------------------------|---|--------|
| Source Language         | : | GO     |
| Implementation Language | : | Python |
| Target Language         | : | MIPS   |

## Features (Basic) Implementation Details

### Features Implemented

1. Data types - Integer, Boolean, String, Float
2. Variables and Expressions
3. Conditionals
4. Loops (For)
5. Switch-Case
6. Input/Output statements
7. Arrays
8. Functions (Recursion)
9. Struct Data Type
10. Pointers
11. Pass by Reference and value
12. Short Assignment
13. Print without delimiters (of multiple data types)

### Features not implemented

1. Library Functions
2. Class Data Type
3. Function Prototyping
4. Global Variables
5. Complex float features

# Advanced Features

- Multi-Level Pointers:  
For int, bool, strings etc
- Multiple Return Values ( of any size/types )
- Complex Data Types:  
Array of Struct, Array of strings etc
- Malloc - Dynamic Memory Allocation  
Linked List, BST implementation
- Functions with any number of parameters ( of any sizes/types )
